

**1. Identification of the Material and Supplier**

**Product Name** Floral Green - Disinfectant Cleaner  
**Product Use** Cleaner disinfectant, deodorizer for cleaning bathroom and toilet areas.  
 Recommended use dilution 1 part in 25 parts of water for spray and wipe and 1 part in 64 for mopping  
**Creation Date:** 01 August 2010  
**Supplier** Compliant Cleaning Supplies & Systems Pty Ltd  
**ABN** 27 144 521 200  
**Mail Address** PO Box 258 Hamilton QLD, 4007  
**Telephone:** 1300 314 491  
**Facsimile** 07 3363 1523  
**Emergency Telephone:** 1300 307 755 (Available 24 Hours)

**2. Hazards Identification**

**STATEMENT OF HAZARDOUS NATURE**

**NON-HAZARDOUS SUBSTANCE. NON-DANGEROUS GOODS.** According to the criteria of Safe Work Australia, and ADG Code.

**Risk Phrases:** Not Hazardous - No criteria found  
**Safety Phrases:** Not Hazardous - No criteria found.  
**SUSDP Classification:** Not a Poison  
**ADG Classification** None allocated. Not a Dangerous Good.  
**UN Number:** None allocated

**Emergency Overview**

**Physical Description & colour** Clear red mobile liquid.  
**Odour:** Floral odour.  
**Major Health Hazards:** No major health hazards are known.

**Potential Health Effects**

**Inhalation:** Inhalation of product mist may cause respiratory irritation: Symptoms may include coughing and difficulty breathing. Move person to fresh air  
**Skin Contact:** Symptoms may include pain, redness and swelling.  
**Eye Contact:** Symptoms may include pain, redness, swelling and tearing  
**Ingestion:** Symptoms may include nausea, vomiting, pain and diarrhea. Do not induce vomiting,

**Carcinogen Status:**

**NOHSC:** No significant ingredient is classified as carcinogenic by NOHSC.  
**NTP:** No significant ingredient is classified as carcinogenic by NTP.  
**IARC:** No significant ingredient is classified as carcinogenic by IARC.

**3. Composition/Information on Ingredients**

(Listed when present at 1% or greater, carcinogens at 0.1% or greater)

Chemical Name	% Weight	CAS Registry Number	TWA (mg/m3)	STEL (mg/m3)

Compound

Compliant Cleaning Supplies & Systems Pty Ltd  
not set not set

This is a commercial product whose exact ratio of components may vary slightly. Minor quantities of other non hazardous ingredients are also possible.

The TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week. The STEL (Short Term Exposure Limit) is an exposure value that should not be exceeded for more than 15 minutes and should not be repeated for more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The term "peak "is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.

#### 4. First aid measures

For Advice contact a Poisons Information Centre (phone eg. Australia 131126; New Zealand 0 800 764 766) or a Doctor.

**For Ingestion:** Do not induce vomiting unless advised by physician or poison control center. Immediately give 3-4 glasses of milk (if none, give water). Get medical attention. Do not give anything by mouth to an unconscious person. Call a physician. Probable mucal damage may contraindicate the use of gastric lavage. Measures against circulatory shock as well as oxygen and measures to support breathing manually or mechanically may be needed.

**For Skin:** Remove contaminated clothing. Wash skin thoroughly with soap and water. Get medical attention if irritation persists. Wash contaminated clothing before reuse. As for all foreign materials, wash off concentrate and dilute use solutions with water. Remove clothing which has been saturated by concentrate. Do not allow prolonged contact with the concentrated undiluted material as toxic amounts can be absorbed. Decontaminate affected clothing and shoes.

**For Eyes:** Immediately flush with plenty of water for at least 15 minutes. Remove contact lenses Hold eyelid open to insure complete washing. Get Medical Attention.

**For Inhalation:** Move person to fresh air. Get medical attention if irritation persists.

**Notes to Physician:**

Treat symptomatically.

For exposures to quaternary ammonium compounds;

- For ingestion of concentrated solutions (10% or higher): Swallow promptly a large quantity of milk, egg whites / gelatin solution. If not readily available, slurry of activated charcoal may be useful. Avoid alcohol. Because of probable mucosal damage omit gastric lavage and emetic drugs.
- For dilute solutions (2% or less): If little or no emesis appears spontaneously, administer syrup of Ipecac or perform gastric lavage.
- If hypotension becomes severe, institute measures against circulatory shock.
- If respiration labored, administer oxygen and support breathing mechanically. Oropharyngeal airway may be inserted in absence of gag reflex. Epiglottic or laryngeal edema may necessitate a tracheotomy.
- Persistent convulsions may be controlled by cautious intravenous injection of diazepam or short-acting barbiturate drugs. [Gosselin et al, Clinical Toxicology of Commercial Products]

#### 5. Fire fighting measures

**Fire and Explosion Hazards:** There is no risk of an explosion from this product under normal circumstances if it is involved in a fire. This product is likely to decompose only after heating to dryness, followed by further strong heating.

**Extinguishing Media:** Not Combustible. Use extinguishing media suited to burning materials.

**Fire Fighting:**

**Flash point:** Does not burn

**Upper Flammability Limit:** Does not burn

**Lower Flammability Limit:** Does not burn.

**Autoignition temperature:** Does not burn.

**Flammability Class:** Does not burn.

## 6. Accidental release measures

**Accidental release:** Minor spills do not normally need any special cleanup measures. In the event of a major spill, prevent spillage from entering drains or water courses. As a minimum, wear overalls, goggles and gloves. No special recommendations for clothing materials. Stop leak if safe to do so, and contain spill.

Absorb onto sand, vermiculite or other suitable absorbent material. If spill is too large or if absorbent material is not available, try to create a dike to stop material spreading or going into drains or waterways. Sweep up and shovel or collect recoverable product into labeled containers for recycling or salvage, and dispose of promptly. Recycle containers wherever possible after careful cleaning. After spills, wash area preventing runoff from entering drains. If a significant quantity of material enters drains, advise emergency services. This material may be suitable for approved landfill. Ensure legality of disposal by consulting regulations prior to disposal. Thoroughly launder protective clothing before storage or re-use.

### Handling and storage

**Handling:** Keep exposure to this product to a minimum, and minimize the quantities kept in work areas. Check Section 8 of this MSDS for details of personal protective measures, and make sure that those measures are followed. The measures detailed below under "Storage" should be followed during handling in order to minimize risks to persons using the product in the workplace. Also, avoid contact or contamination of product with incompatible materials listed in Section 10.

**Storage:** Store packages of this product in a cool place. Make sure that the product does not come into contact with substances listed under "Materials to avoid" in Section 10.

## 7. Exposure controls /personal protection

The following Australian Standards will provide general advice regarding safety clothing and equipment:

Respiratory equipment: **AS/NZS 1715**, Protective Gloves: **AS 2161**, Industrial Clothing: **AS2919**, Industrial Eye Protection: **AS1336** and **AS/NZS 1337**, Occupational Protective Footwear: **AS/NZS2210**.

Exposure Limits TWA (mg/m<sup>3</sup>) STEL (mg/m<sup>3</sup>)

Exposure limits have not been established by NOHSC for any of the significant ingredients in this product.

Ventilation: Use adequate ventilation. Use solution presents no general hazard.

Respiratory Protection: Not required under normal working/use conditions.

Eye Protection: Not normally required. Use if mist will get into the eyes in specific applications.

Skin Protection: Use gloves if hands will be continually in solution. Not normally necessary in general use as this product is used in a spray bottle.

Personal Hygiene: As in handling any detergent, wash thoroughly after use.

## 8. Physical and chemical properties

Physical Description & colour: Clear red mobile liquid

Odour: Pleasant Fragrance

Boiling Point: Approximately 100°C at 100kPa.

Freezing/Melting Point: Lower than 0o C.

Volatiles: Water component.

Vapour Pressure: 2.37 kPa at 20°C (water vapour pressure).

Vapour Density: No data.

Specific Gravity: 1.025

Water Solubility: Completely soluble in water.

pH: In concentrate: 9.5, In use 7.5

Volatility: No data.

Evaporation Rate: No data

## 9. Stability and Reactivity

## Material Safety Data Sheet

Compliant Cleaning Supplies & Systems Pty Ltd

Reactivity: This product is unlikely to react or decompose under normal storage conditions. However, if you have any doubts, contact the supplier for advice on shelf life properties.

Conditions to Avoid: None known.

Incompatibilities: No particular incompatibilities.

Fire Decomposition: Small quantities of carbon dioxide may be generated.

Polymerisation: This product is unlikely to undergo polymerisation processes.

### 10. Toxicological information

**Target Organs:** There is no data to hand indicating any particular target organs.

#### Classification of Hazardous Ingredients

Ingredient	Risk Phrases
No hazardous ingredients present in hazardous concentrations.	

### 11. Ecological information

This product is biodegradable. It will not accumulate in the soil or water or cause long term problems.

### 12. Disposal considerations

Containers should be emptied as completely as practical before disposal. If possible, recycle containers either in-house or send to recycle company. If this is not practical, send to a commercial waste disposal site. This product should be suitable for landfill. However, check with local Waste Disposal Authority before sending there. Note that product properties may have been changed in use, significantly altering its suitability for landfill. Please do NOT dispose into sewers or waterways.

### 13. Transport information

**ADG Code:** This product is not classified as a Dangerous Good. No special transport conditions are necessary unless required by other regulations.

### 14. Regulatory information

**AICS:** All of the significant ingredients in this formulation are to be found in the public AICS Database.

### 15. Other information

This MSDS contains only safety-related information. For other data see product literature.

#### Acronyms:

ADG Code	Australian Code for the Transport of Dangerous Goods by Road and Rail
